

**John W. Fitzpatrick, P.E. – Senior Director, Facilities Services, The Jackson Laboratory**

John W. Fitzpatrick, P.E. began his tenure at The Jackson Laboratory in January 1988 as a Mechanical Engineer and after nearly twenty-three years of continued service currently holds the position of Senior Director, Facilities Services. In this position John is responsible for oversight and direction for the planning, development, coordination, implementation and management of all Jackson Laboratory facilities in both Bar Harbor, ME and Sacramento, CA. With a staff of approximately 80 individuals from such departments as Engineering, Security, Maintenance, Utility Plant, and Functional Services, John is directly accountable for developing and maintaining facilities that align and support The Jackson Laboratory's strategic goals and mission.

John received his B.S. in Mechanical Engineering from Rochester Institute of Technology, is a Registered Professional Engineer in the State of Maine, and an AEE Certified Energy Manager. John is also a member of ASHRAE, Association of Energy Engineers and the Maine Indoor Air Council.
